What's inside this guide

Every feature in SocialPilot, what it does, and how it saves you time and makes you more money. AI is optional everywhere — every tool also works manually with templates or your own writing.

1. START — Train your AI in 5 minutes

Onboarding teaches SocialPilot exactly who you are, so every output sounds like you.

Onboarding

Pick your creator path, niche, vibe, audience and posting cadence.

+ Replaces ~10 hrs of brand strategy. Every AI tool uses this forever.

Brand Voice

Paste 3–5 of your best captions. The AI learns your tone, rhythm, slang.

+ Posts stop sounding like ChatGPT. Zero edits needed.

Creator Studio

Lock your fonts, colors and visual templates for quote posts and carousels.

+ Consistent aesthetic — what makes a page look 'big' instantly.

2. CREATE — Never stare at a blank screen again

AI tools that produce a week of on-brand content in minutes.
